SUMMARY

Aspiring Software Engineer with strong foundations in programming, software development, and problem-solving. Familiar with backend, and frontend, with hands-on experience building scalable applications using Java, Python, JavaScript, and modern development tools. Interested in learning enterprise technologies and contributing to real-world software development projects.

TECHNICAL SKILLS

Programming Languages	Web Development	Tools/Cloud/Software
java, Python, JavaScript, C .	HTML, CSS, React.Js, Node.Js, Rest APIs	Git, GitHub, MySQL, MongoDB, OOP Concepts, Gen AI, LLM , AI Agents

PROJECTS

MALICIOUS URL DETECTION SVM WITH LLM

Developed a malicious URL detection system using SVM and LLM techniques by extracting URL features such as domain patterns, URL structure, and redirection behavior for prediction.

Tech Stack: Python,SVM,LLM,Regex,URL parsing.

LOSTMATE-INTELLIGENT ITEM MATCHING & RECOVERY SYSTEM

Built an AI-powered web application that intelligently matches lost and found items using user inputs and similarity algorithms, enabling faster and more accurate item recovery.

Tech Stack: Java,Spring Boot,HTML,CSS,AI,Machine Learning,Firebase

EDUCATION

Narayana Engineering College (2021-2025)

Computer Science & Engineering - 85%

Sri Chaitanya Junior College (2019-2021)

MPC Intermediate - 83%

Oxford English Medium High School (2018-2019)

Higher Secondary School - 87%

EXPERIENCE

Freelance Web & Mobile App Developer

[Mar 2025 to Continue..]

Developed and deployed full-stack web applications independently. Managed the complete development lifecycle including design, development, testing, and deployment. Focused on building scalable applications with good user experience and optimized performance using modern development tools and AI-assisted workflows.

ADDITIONAL INFORMATION

Achievements

- Ninja Slayground 2.0 Finisher, demonstrating consistency and competitive coding practice.
- Participated in Hackademia at NECN, collaborating in team-based learning.

Leadership & Community

- Coding club-Led coding activities,mentored peers,and contributed to collaborative projects.
- Quick learner with strong problem-solving and collaborative skills.
